Mr. Duckett

OSI Change Submitted on [REDACTED]
Report

25X1A

This afternoon at 1645 [REDACTED] called to submit a change on the information relating to [REDACTED] contained on page six of the spread sheet. Under the third column dealing with "Project Capability to Derive Intelligence" OSI found after additional research that the statement, "Potential of successful intercept essentially zero," is not correct; and they ask that it be deleted. [REDACTED] said the other points still hold, namely, lack of tipp-off, short time on station, and political considerations.
